- **[Working principle]** The high-frequency quenching and heat-treated alloy steel character wheel will engrave letters or numbers with a certain depth (0.1~0.3mm deep) on the metal plate under the action of external force (hand pressing or rubber hammer).
- **[Character wheel]** This nameplate stamping machine comes with one character wheel. The wheel is made of die steel and the hardness is 5 times that of ordinary steel. Each wheel includes 40 characters: 10 numbers, 26 uppercase letters, 4 common symbols(note: no lowercase letters).
- **[Parameters]** Thickness of character wheel: 6mm; Diameter of wheel: 80mm; Characters: 40pcs; 26 uppercase letters on wheel: ABCDEFGHIJKLMNOPQRSTUVWXYZ; 10 numbers on wheel: 1234567890; 4 common symbols: ·× / —
- **[How to choose the character wheel]** The size of the wheel means the height of the printed character, such as the character height printed by No.3 character wheel is 3mm.
- **[Usage]** Changed parameters engraved on the metal plate: such as specific model, date, batch number, serial number, serial number, etc. Apply for all kinds of aluminum, copper, stainless steel, plastic nameplates on machinery, electromechanical, water pumps, valves, automobiles and motorcycles, and electrical appliances.
