Dear Carrie,
Scope of work:

DIGI will create two video security and access control systems so that the sheriffs office will have control of managing the systems the sheriffs office is in charge. Emergency management department will manage the second system that handles the municipal building and some of the courthouse.

DIGI will need to upgrade the existing video security system at the courthouse to create the ability to integrate the system and allow the needed configurations.

Muskogee County - Emergency MGMT - Access Control Badging Configuration - State Contract SW1048D.pdf;

Hi Carrie,

I hope you're doing well. I spoke to my team lead James about the configurations that need to be changed in order to accomplish the Task at hand with the security camera and access control upgrades for the sheriffs office. I have attached the quote that needs to be approved in order to do all of this. I sent Greg Martin the sheriffs dep portion of this and both of them need to be performed at the same time. Hes already approved his portion, so half the work is good to go. Please let me know if you have any questions about any of this.

Please let me know when you can get this approved and I will get my team aligned.

Thank you,

Sean Hardani
