

Fiscal Recovery Funds  
Expenditure Documentation

Date 4/10/2023

MUSKOGEE County, Oklahoma

Identify the need or risk

During persistent weather events, water backup and the absence of proper drainage on 63rd Street in Braggs, OK, in District 1, causes flooding and significant damage to the roads. Ingress and egress for residents is affected and there is also a risk to the ability of emergency services reaching residents in this area, during these times.

How does the proposed expenditure respond to the need or risk?

This project will increase drainage and allow for quicker recovery from flooding events.

Expenditure Category Infrastructure

Expenditure: detail level 2.13 Other Economic Support

FAQ number (if applicable)

Estimated amount of expenditure \$ 100,000.00
