County, Oklahoma

Identify the need or risk

During persistent weather events water backup and the absence of proper drainage on E. 213th St., E. 283rd St., and 293rd St. in District 2 causes flooding and significant damage to these roads. Ingress and egress for residents is affected and there is also a risk to the availability of emergency services reaching residents in these areas during these times.

How does the proposed expenditure respond to the need or risk?

The purchase of 2 tanker cars will give District 2 the ability to increase drainage. By cutting the cars in half, District 2 will be able to increase drainage at 4 separate locations thereby reducing flooding and mitigating further damage.
