

Fiscal Recovery Funds
Expenditure Documentation

Date

Identify the need or risk

During persistent weather events, water backup and the absence of proper drainage at the bridge over Starvilla Creek in Dist. 2, causes flooding and significant damage to the road. Ingress and egress for residents is affected and there is also the risk of the ability of emergency services reaching residents in this area, during these times.

How does the proposed expenditure respond to the need or risk?

Replacement of this 55' bridge will increase drainage and allow for quicker recovery from flooding events.
