Muskogee, OK 74403

Road Use Restrictions

This letter serves to inform **Kemp Construction & BK Custom Homes** of the approved routes and load limits for movement of trucks and specified materials along Muskogee County roads for project hauling.

Approved Route:

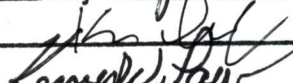

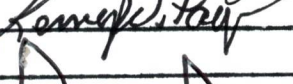

This route is the weight-restricted approved route for all vehicles and equipment weighing 26,001 pounds or more supporting the **Southern Ridge Development** project.

- From Highway 64/Cherokee St.
- Turn east on S. 13th St E. (just north of Elm Grove Rd)
- Travel along S. 13th St E. to project site north of E. 83rd St.
- For purposes of this project, trucks must use the reverse of this route to return to Highway 64.
- E. 83rd St S and E. 93rd St S are prohibited from being used for construction vehicle traffic in support of this project.

The approved route is strictly enforced for all trucks hauling for this project. Trucks must not exceed GVWR limits specified for each truck and/or trailer. The General Contractor/Owner must inform all sub-contractors of the approved route. Failure to follow these guidelines may result in the contractor/owner being held liable for damages sustained to roads or bridges.

This restriction is in effect immediately. Kemp Construction is only responsible for trucks and equipment supporting construction activities under their control and or hire. Termination of this restriction is effective upon completion of developer/owner construction activities.
