

Fiscal Recovery Funds
Expenditure Documentation

Date 12/12/2022

MUSKOGEE County, Oklahoma

Identify the need or risk

The use of a mobile inmate tracking and documentation system is needed to further enhance our ability to care for inmates who are isolated or quarantined in the fiels. Implementing Wi-Fi and mobile documentation for officers and medical staff will further reduce the liklihood of transmitting COVID-19 in the facility.

How does the proposed expenditure respond to the need or risk?

See Attachment

Expenditure Category Public Health

Expenditure: detail level 1.3 COVID-19 Contact Tracing

FAQ number (if applicable)

Estimated amount of expenditure \$ 68,205.30

Submitted to Governing Board by Andy Simmons, Sheriff

Guardian RFID System Proposal

For consideration of the Muskogee County Board of Commissioners

ARPA Funds Usage: The use of a mobile inmate tracking and documentation system is needed to further enhance our ability to care for inmates who are isolated or quarantined in the field. Implementing Wi-Fi and mobile documentation for officers and medical staff will further reduce the likelihood of transmitting COVID-19 in the facility in the following ways:

1. Special status can be placed on an inmate with which contact requires PPE.
2. Quarantine housing timelines can be managed through special status and keep the entire facility on the same page.
3. 3 Officers are able to document any updates given by inmates at the point of responsibility for enhanced communication with medical staff
4. Utilizing an electronic rounds and inmate interaction system will allow facility staff to contract trace an outbreak in a facility quickly by running reports of any staff member who had any interaction with a particular inmate(s).
5. Documenting when cleaning supplies have been issued in the facility and providing simplified reporting to ensure compliance is an essential tool for further mitigation of Covid-19 spreading throughout the facility.

The use of the Medication Manager solution will enable us to know when medications, shots, or treatments are due for the inmate population. This feature also provides alerts when medications are due, so compliance with prescriptions and timelines are measurable and achievable.
